01 / METHOD & PLACEMENTS

Calculation & domain markers

Interpretive guideline

02 / PRIMARY HOUSE ANALYSIS

House 10: Work and public contribution

House placement & sign characteristics

Dhanu · Sagittarius occupies your house 10. Sign archetype: perspective. A wider frame can renew interest in a problem. Translate an inspiring idea into one practical experiment before making a major commitment. Occupying planets: Sun, Mercury.

Ruler dynamics & location

Under classical domicile rules, house 10 is governed by Jupiter, situated in house 2 (Aries). This connects the themes of visible work, responsibility and contribution with personal resources, family habits and everyday speech.

Traditional interpretation

In Vedic tradition, house 10 reflects An exploration of vocation, visible contribution, work style, and professional timing. Notice whether this symbolism resonates with your everyday experiences and career or relationship pacing.

Practical inquiry

Describe the work you want to be known for and one observable step toward it. This chart does not determine job suitability, earnings or promotion dates. Keep ordinary explanations beside symbolic themes.

03 / GRAHAS & SUBDIVISIONS

Planetary significators & divisions

Primary significator

Saturn in Mesha · Aries (House 2, retrograde). Saturn is traditionally associated with structure, duration and limits. A Saturn placement or period is not a curse and does not establish a Sade Sati transit. It provides the symbolic archetype of consistency, limits and sustained responsibility.

Secondary significator

Mercury in Dhanu · Sagittarius (House 10). Mercury is traditionally linked with communication, learning and negotiation. A placement does not establish intelligence, honesty or a communication disorder. It highlights complementary strengths and communicative nuances.

Divisional indicators

D10 division: Ascendant in Makara · Capricorn, Saturn in Kanya · Virgo. This divisional classification provides traditional context regarding sustained inclinations.

Caution on overclaiming

Divisional markers describe symbolic classification, not guaranteed future milestones, wealth, or relationship dates. Always prioritize observable preparation and documented facts.

How to read the timeline

Planetary periods are milestones in a traditional timing framework, not rigid appointments with fate. A period transition does not compel an event; it offers a cadence for deliberate reflection and review.
