Your calculation record

Inputs used

2000-01-01, 12:00 local time. Mumbai, India (fictional sample). Latitude 19.076, longitude 72.8777. Timezone Asia/Kolkata. UTC moment 2000-01-01T06:30:00.000Z.

Calculation settings

Astronomy Engine 2.1.19. Geocentric true ecliptic of date; apparent positions. Whole sign houses. Offset 23.853136 degrees. Model: lahiri. Time certainty: exact.

Precision and limits

Revised Lahiri reference realized with IAU 2006 precession and IAU 2000B nutation. Tested against independent Swiss Lahiri samples within 1 arcsecond; not bit-identical to Swiss Ephemeris. Planetary positions retain Astronomy Engine precision (about an arcminute), so boundary-sensitive outputs need care. Rahu/Ketu, yogas, doshas, matching scores and interpretive predictions are not included. Dasha begins with the remaining birth period; dates use fixed 365.25-day years. UTC-to-TT uses Astronomy Engine’s Espenak-Meeus Delta-T model. Far-future Earth-rotation predictions differ between ephemerides; the 2100 reference Moon differs by about 65 arcseconds. Exact time supplied by you; the tool cannot verify your birth record or coordinate precision.

Reproducibility

Report edition patrika-50-royal-lahiri-v3. Period labels are evaluated at 2026-10-31, the saved booking date, so regenerating a download does not silently change the reading. More decimal places describe numerical output, not independently verified birth-data accuracy.

How to use this book

What is personal

The house chapters use your Pisces ascendant and calculated placements. The planet chapters use each planet's sign, house, motion and subdivisions. The period chapters use your saved chart's own timeline.

Where to find things

Pages 4-7: D1, D9, D10 and a planetary table. Pages 8-19: twelve house chapters. Pages 20-26: seven classical planets. Pages 27-28: Moon and Nakshatra. Pages 29-32: period tables and interpretation. Pages 33-39: traditional remedy context and modern habits. Pages 40-43: life-area studies. Pages 44-49: six workbook pages. Page 50: references and a closing review.

Data, interpretation, action

First identify the calculated fact. Then decide whether the traditional theme is useful to you. Finally choose an ordinary, reversible action. An interpretation may feel relevant without proving that astrology caused or predicted an event.

Your privacy

This PDF contains your birth details. Keep it and your private access link safe. Server access expires thirty days after booking. The report has no public sharing URL, and no automatic report email or WhatsApp message is sent.

03 / BIRTH CHART

Your D1 house map

Whole-sign arrangement

Your rising sign is Meena · Pisces, at 6.928 degrees. That entire sign is house 1; subsequent signs form houses 2 through 12.

Reading the map

The chart below is a house grid. Each cell names the house, sign and calculated bodies. An empty cell means none of the ten calculated bodies occupies that sign; it does not mean the life area is absent.

Traditional scope

Seven classical planets are discussed in depth. Uranus, Neptune and Pluto are included as astronomical table entries only. Rahu and Ketu positions, aspects, yogas, doshas and strength scores are not calculated in this edition.

Your D9 sign divisions

Calculation

The D9 subdivision is calculated from each selected sidereal longitude. Ascendant division: Kanya · Virgo.

Your division table

Sun: Simha · Leo
Moon: Meena · Pisces
Mercury: Mithuna · Gemini
Venus: Kanya · Virgo
Mars: Vrishchika · Scorpio
Jupiter: Mesha · Aries
Saturn: Simha · Leo
Uranus: Karka · Cancer
Neptune: Meena · Pisces
Pluto: Dhanu · Sagittarius

Interpretive boundary

D9 is a traditional subdivision often studied alongside the birth chart. It cannot establish marriage timing, fidelity or the quality of another person. This page gives sign divisions, not a complete independently interpreted relationship chart.

Check before relying on it

Small changes in birth time or offset can move a division boundary. Compare a trusted calculation using the same frame and offset if a boundary-sensitive result matters.

05 / DASHAMSA

Your D10 sign divisions

Calculation

The D10 subdivision is calculated from each selected sidereal longitude. Ascendant division: Makara · Capricorn.

Your division table

Sun: Vrishabha · Taurus
Moon: Meena · Pisces
Mercury: Kumbha · Aquarius
Venus: Kanya · Virgo
Mars: Meena · Pisces
Jupiter: Mesha · Aries
Saturn: Kanya · Virgo
Uranus: Meena · Pisces
Neptune: Dhanu · Sagittarius
Pluto: Dhanu · Sagittarius

Interpretive boundary

D10 is traditionally studied in discussions of work and responsibility. These sign divisions cannot determine employment eligibility, profession, income or business success. They are not a substitute for skills, market evidence and ordinary career planning.

What motion means

Direct or retrograde describes the direction of apparent geocentric motion around your birth moment. Retrograde is not inherently bad and does not establish that a life area is delayed or damaged.

Which longitude is used

Revised Lahiri reference; IAU 2006 precession / IAU 2000B nutation. The degree shown is the position within its selected thirty-degree sign. The ascendant is 6.928 degrees within Pisces. This table does not include stellar parallax corrections supplied by a separate ephemeris provider.

Traditional lens

This house is traditionally associated with initiative, identity and the way you enter unfamiliar situations. Its sign supplies the symbolic theme of imagination. Imagination can make room for new possibilities. Write down what is observed separately from what is hoped for or symbolically interpreted. These are prompts for inquiry, not a description that you must accept as your personality.

Follow the connection

The house-1 ruler in house 2 suggests an optional reflection between initiative, identity and the way you enter unfamiliar situations and personal resources, family habits and everyday speech. Look for one actual example before adopting that connection. An empty house is read through its sign and ruler here; it is never treated as a missing life experience.

A practical experiment

Begin a task before judging how confident you feel. Separate your chosen role from what others expect you to be. Define a small action, a time limit and an observable result. Keep ordinary causes beside the symbolic explanation.

Your Moon study

Your lunar position

A careful reading

The Moon is traditionally associated with changing experience, familiarity and care. Its sign and house offer a symbolic vocabulary, not a diagnosis of emotional stability. Notice whether the theme is useful in an ordinary situation rather than searching your memories only for confirmation. Your own account of your experience takes priority over this text.

Seven-day observation

For seven days, record one situation connected with house 8, what you needed and how you responded. Also note workload, conversations, surroundings and other ordinary circumstances. Do not read the chart as a medical or mental-health assessment.

A question to revisit

What do I need to feel settled, and have I asked for it clearly? What response helped, and what could you communicate earlier next time?

Your result

Swati, Pada 4; period lord Rahu. Remaining first major period at birth: 4.4390 Julian years.

What is being divided

The sidereal zodiac is divided into twenty-seven equal sectors; each has four quarters. This geometrical classification supplies the birth-period sequence used here. A sector label is not proof of a fixed instinct, caste, temperament or future event.

Boundary check

The selected offset is 23.853136 degrees. A different birth-epoch offset can move a nearby sector or quarter boundary. The approximate automatic model is not an exact Lahiri calculation.

Use the label constructively

Write what you expected from the label before reading more about it. Then record where your own experience agrees or differs. Do not infer a family deity, ritual obligation, lucky name syllable or dosha from this page; those traditions require separate sources and conventions.

11 / VIMSHOTTARI DATA

Your major-period timeline

Period model

The first period is the remaining balance at birth; subsequent rows follow the saved calculation. Intervals include the start and exclude the end. Years use 365.25 days.

Your dates

Rahu: 2000-01-01 to 2004-06-09 | 4.439 years
Jupiter: 2004-06-09 to 2020-06-09 | 16.000 years
Saturn: 2020-06-09 to 2039-06-10 | 19.000 years
Mercury: 2039-06-10 to 2056-06-09 | 17.000 years
Ketu: 2056-06-09 to 2063-06-10 | 7.000 years
Venus: 2063-06-10 to 2083-06-10 | 20.000 years
Sun: 2083-06-10 to 2089-06-09 | 6.000 years
Moon: 2089-06-09 to 2099-06-10 | 10.000 years
Mars: 2099-06-10 to 2106-06-11 | 7.000 years

Reading the dates

These dates are boundaries in a traditional timing model, not appointments for events. A new row does not guarantee a job, relationship, loss or recovery. Compare periods only when birth details, time scale and offset conventions match.

Check your reference date

The report uses 2026-10-31 as its reference date. A later re-download preserves this original edition. Life Explorer can inspect other chosen dates without rewriting the book.

12 / A CHOSEN MOMENT

Your current period

Calculated at the report date

Saturn major period: 2020-06-09 to 2039-06-10. Ketu sub-period: 2026-02-20 to 2027-04-01.

Theme, not forecast

Saturn is traditionally associated with structure, duration and limits. A Saturn placement or period is not a curse and does not establish a Sade Sati transit.

A bounded action

Reduce one commitment to a realistic weekly step. Review what was completed and renegotiate what was not, without treating difficulty as punishment.

Your evidence log

What is happening now that you can actually observe? What interpretation are you adding? What ordinary explanation could also fit? Review the action because of its result, rather than because a period label told you it must work.

13 / EXPAND THE TIMELINE

Sub-periods in view

The chosen parent period

Saturn is the parent period containing 2026-10-31.

Calculated sub-period dates

Saturn: 2020-06-09 to 2023-06-13
Mercury: 2023-06-13 to 2026-02-20
Ketu: 2026-02-20 to 2027-04-01
Venus: 2027-04-01 to 2030-05-31
Sun: 2030-05-31 to 2031-05-13
Moon: 2031-05-13 to 2032-12-12
Mars: 2032-12-12 to 2034-01-21
Rahu: 2034-01-21 to 2036-11-27
Jupiter: 2036-11-27 to 2039-06-10

The calculation rule

Each full parent period is divided in the traditional nine-lord sequence with proportional weights. The first birth period is clipped to the time remaining at birth. This report does not calculate finer subdivisions or verify that an event matches a transition.

Before planning around a date

Use ordinary deadlines, availability, preparation and consent first. A period boundary does not make a date safe, unsafe, lucky or unsuitable. Compare the method and uncertainty before comparing two apps.

14 / INTERPRET WITH CARE

A period check-in

Your reference

Current major label: Saturn. Current sub-label: Ketu. Moon sector: Swati.

The next visible boundary

The saved sub-period ends at 2027-04-01T08:48:01.245Z. This is a model timestamp in UTC, not a guaranteed turning point. Use your local calendar when displaying it.

Do not back-fit an event

Record a question and your expectation before a date passes. Later compare the actual result, including results that do not support your expectation. The report does not rectify your birth time from memories or prove its own predictions.

Practical planning

Choose one ordinary milestone you can influence, such as finishing a draft, discussing an agreement or reviewing a commitment. Write the next action and a review date. Keep the plan useful even if you set astrology aside.

15 / LAL KITAB CONTEXT & HABITS

Sun: tradition to practice

Why this page is in your book

Sun is in house 10, Sagittarius. The practical theme on this page is visibility, purpose and responsibility, considered alongside visible work, responsibility and contribution. This is not a finding that the planet is afflicted or needs correction.

Traditional context

The Sun is traditionally associated with clarity, leadership and the use of authority. These associations can frame a reflection on responsibility; they do not certify a leadership personality. Lal Kitab is a distinct interpretive tradition with its own house rules and source editions. This page does not reproduce a textual prescription or claim that a Vedic sign placement alone establishes a Lal Kitab remedy.

A modern behavioral option

Choose one responsibility to finish without seeking immediate praise. Invite specific feedback on its usefulness. Apply the experiment to one ordinary situation involving visible work, responsibility and contribution. Choose a review date and an observable sign of usefulness.

A voluntary cultural practice

Respect and service are optional cultural practices. Do not use staring at the Sun, fasting or health-related rituals. A practice can have personal or cultural meaning without a claim that it changes planetary effects. No gemstone, payment, donation, mantra or ritual is required by this report.

Your review

When does visibility serve the work, and when am I seeking reassurance? Keep the action only if it helps in ordinary life. Stop a practice that causes distress, expense, conflict or harm. This is educational commentary, not a certified remedial consultation.

A modern behavioral option

Keep a short record of ordinary circumstances, what you felt and what helped. Look for practical patterns without assigning every change to a transit. Apply the experiment to one ordinary situation involving shared responsibilities, uncertainty and transitions. Choose a review date and an observable sign of usefulness.

A voluntary cultural practice

A gentle routine can support reflection. Persistent distress needs appropriate support, not an astrological explanation. A practice can have personal or cultural meaning without a claim that it changes planetary effects. No gemstone, payment, donation, mantra or ritual is required by this report.

Your review

What do I need to feel settled, and have I asked for it clearly? Keep the action only if it helps in ordinary life. Stop a practice that causes distress, expense, conflict or harm. This is educational commentary, not a certified remedial consultation.

Lal Kitab is a distinct interpretive tradition with its own house rules and source editions. This page does not reproduce a textual prescription or claim that a Vedic sign placement alone establishes a Lal Kitab remedy.

A modern behavioral option

Write a difficult idea in three plain sentences. Ask someone to repeat what they understood before deciding that your message was clear. Apply the experiment to one ordinary situation involving visible work, responsibility and contribution. Choose a review date and an observable sign of usefulness.

Traditional context

Venus is traditionally linked with art, pleasure and relationship values. Its placement cannot predict marriage, fidelity, attractiveness or another person's feelings. Lal Kitab is a distinct interpretive tradition with its own house rules and source editions. This page does not reproduce a textual prescription or claim that a Vedic sign placement alone establishes a Lal Kitab remedy.

Apply the experiment to one ordinary situation involving beliefs, mentors, travel and broader study. Choose a review date and an observable sign of usefulness.

A voluntary cultural practice

Choose a safe, suitable activity within your own abilities. Do not adopt extreme exercise or confrontational rituals. A practice can have personal or cultural meaning without a claim that it changes planetary effects. No gemstone, payment, donation, mantra or ritual is required by this report.

House 3: Taurus; no calculated occupants. House 6: Leo; no calculated occupants. House 10: Sagittarius; Sun, Mercury. House 11: Capricorn; Uranus, Neptune.

How this chapter was selected

These traditional life areas draw together houses 3, 6, 10, 11. The report uses your actual sign and occupancy data; it does not combine them into a hidden compatibility, wealth or success score.

A useful interpretation

Choose a skill that can be practised for twenty minutes. Ask for concrete feedback on one attempt rather than waiting for a perfect launch. Reduce friction in one repeated task. Health concerns need qualified care; this chart cannot diagnose a condition or prescribe treatment. Describe the work you want to be known for and one observable step toward it. This chart does not determine job suitability, earnings or promotion dates. Check whether a group supports your actual values. Try a small contribution before making a large commitment of time or money.

A practical decision record

What skill or useful output can I demonstrate this month? Describe the situation, your options, the evidence and whose consent is needed. Then choose a small next step. Seek qualified advice for decisions involving money, health, law or safety.

What would change your mind?

List a result that would make you revise this interpretation. A chapter that resonates is an invitation to reflect, not evidence that a major decision has been validated by a chart.

How this chapter was selected

These traditional life areas draw together houses 4, 5, 7. The report uses your actual sign and occupancy data; it does not combine them into a hidden compatibility, wealth or success score.

A useful interpretation

Notice which physical surroundings help you settle. Try a modest change to your desk, room or routine before interpreting discomfort as destiny. Make something without requiring it to earn approval. A creative experiment is evidence about your interests, not a promise about income or children. Write down one expectation and discuss whether it is shared. A placement cannot establish another person's intentions or determine whether a relationship should continue.

A practical decision record

What expectation could be discussed more clearly? Describe the situation, your options, the evidence and whose consent is needed. Then choose a small next step. Seek qualified advice for decisions involving money, health, law or safety.

01 / METHOD & PLACEMENTS

Calculation & domain markers

Birth inputs

2000-01-01, 12:00 local time at Mumbai, India (fictional sample). Lat 19.076, Long 72.8777, Asia/Kolkata.

Ascendant and core anchors

Meena · Pisces rising (6.93 deg). Moon in Tula · Libra (House 8, Swati). Sun in Dhanu · Sagittarius (House 10).

Relevant house configurations

House 10 (Sagittarius): Sun, Mercury. Traditional focus: Work and public contribution.
House 6 (Leo): no occupants. Traditional focus: Routine and service.
House 2 (Aries): Jupiter, Saturn. Traditional focus: Resources and speech.

Interpretive guideline

Calculated placements are starting points for thoughtful inquiry. An empty house means no planet was transiting that thirty-degree sector at birth; it never signifies an absence or failure in that life area.

02 / PRIMARY HOUSE ANALYSIS

House 10: Work and public contribution

House placement & sign characteristics

Dhanu · Sagittarius occupies your house 10. Sign archetype: perspective. A wider frame can renew interest in a problem. Translate an inspiring idea into one practical experiment before making a major commitment. Occupying planets: Sun, Mercury.

Ruler dynamics & location

Under classical domicile rules, house 10 is governed by Jupiter, situated in house 2 (Aries). This connects the themes of visible work, responsibility and contribution with personal resources, family habits and everyday speech.

Traditional interpretation

In Vedic tradition, house 10 reflects An exploration of vocation, visible contribution, work style, and professional timing. Notice whether this symbolism resonates with your everyday experiences and career or relationship pacing.

Practical inquiry

Describe the work you want to be known for and one observable step toward it. This chart does not determine job suitability, earnings or promotion dates. Keep ordinary explanations beside symbolic themes.

03 / GRAHAS & SUBDIVISIONS

Planetary significators & divisions

Primary significator

Saturn in Mesha · Aries (House 2, retrograde). Saturn is traditionally associated with structure, duration and limits. A Saturn placement or period is not a curse and does not establish a Sade Sati transit. It provides the symbolic archetype of consistency, limits and sustained responsibility.

Secondary significator

Mercury in Dhanu · Sagittarius (House 10). Mercury is traditionally linked with communication, learning and negotiation. A placement does not establish intelligence, honesty or a communication disorder. It highlights complementary strengths and communicative nuances.

Divisional indicators

D10 division: Ascendant in Makara · Capricorn, Saturn in Kanya · Virgo. This divisional classification provides traditional context regarding sustained inclinations.

Caution on overclaiming

Divisional markers describe symbolic classification, not guaranteed future milestones, wealth, or relationship dates. Always prioritize observable preparation and documented facts.

04 / TIMING & CADENCE

Timeline & period alignment

Active period at report date

Major period (Mahadasha): Saturn (2020-06-09 to 2039-06-10). Sub-period (Antardasha): Ketu (2026-02-20 to 2027-04-01).

Relevance to this domain

The current active period lord is Saturn. In your chart, Saturn is situated in house 2, activating themes of consistency, limits and sustained responsibility.

How to read the timeline

Planetary periods are milestones in a traditional timing framework, not rigid appointments with fate. A period transition does not compel an event; it offers a cadence for deliberate reflection and review.

Milestone planning

Choose one concrete milestone that you can directly influence in the coming 60 days. Write the specific observable steps and a completion date.

05 / TRADITION TO PRACTICE

Habits & behavioral context

Grounded behavioral habit

Reduce one commitment to a realistic weekly step. Review what was completed and renegotiate what was not, without treating difficulty as punishment.

Mindful communication & boundaries

In this domain, explicitly state your requirements and boundaries. Clear, documented agreements prevent misunderstandings and unnecessary tension.

Voluntary reflective practice

Practical service and keeping commitments are optional reflective practices. Avoid fear-based purchases, harmful fasting or claims that suffering is deserved.

Ethical and safety safeguards

Reject fear-based remedies, fatalistic predictions, or compulsory purchases. Traditional wisdom is meant to clarify, never to intimidate or prescribe life decisions.

06 / REFLECTION WORKSHEET

Inquiry & self-reflection

Core domain question

What observable contribution or skill can I develop and demonstrate this quarter?

Structured journaling exercise

Use this space to distinguish what you observe from what you interpret or fear. Note your actual experiences, the resources available to you, and where your direct agency lies.

07 / DECISION PLAN & SUMMARY

30-day action & review plan

Next concrete experiment

Define one observable, realistic action you will take within the next thirty days connected with this domain. What is the success metric? Who needs to be informed?

Interpretive boundaries & review
